The US Brown Swiss Breeders Association recently identified BH14, a haplotype linked to early pregnancy loss, with the earliest known carrier being VENTURES ESP BABARAY (W), born in 1978. Over 6% of the US population now carries BH14. New Generation Genetics will help customers manage this risk by clearly marking carrier bulls with "BH14C" and advising careful mating to avoid pairing two carriers. We strongly encourage all breeders to use genomic testing to identify carriers within their herds, helping to minimize the risk of pregnancy loss

**DISCLAIMER OF WARRANTY AND LIMITATION OF LIABILITY**

Availability of all semen is subject to change without notice. Semen is collected, processed and stored in accordance with sound recognized practices. Neither New Generation Genetics, Inc. (NGG) nor owners of bulls leased to NGG nor its employees or agents shall be liable after delivery for any injury or disease caused to any persons, animals or property through the use or handling of the semen. NGG does not guarantee semen to be free of genetic recessives. NGG does not guarantee the fertility capacity of any semen. No warranty of any kind is inferred except to sell and convey good title. Any other warranty is hereby disclaimed. Should a breach of any NGG warranty be deemed by applicable court of law, the purchaser's exclusive remedy shall be limited to replacement of semen or refund of payment at NGG's option and NGG shall not be liable for any consequential or additional damages or expenses.
